SUMMARY

Over 19 years of IT experience focusing on Data warehousing, Data Integration, Data Migration, ETL Processes and Business Intelligence. Developed mappings in Informatica to load the data from various sources into the Data warehouse different transformations like Source Qualifier, Expression, Filter, Router, Lookup, Aggregate, Update Strategy and Joiner. Experience in performance tuning of Informatica Sources, Targets, Mappings, and Sessions.

CORE COMPETENCIES

Knowledge Of Several Operating Systems Including: Windows 7, Windows 8, Windows Server 2003, Windows Server 2008, Linux Red Hat, Linux Ubuntu.

PROFESSIONAL EXPERIENCE

Senior IT Specialist/Technical Lead
ABC Corporation - August 2007 – July 2016

Key Deliverables:
- Activities include equipment and system acquisition, budgeting input and international government onsite support for training and installation.
- Identify, develop and refine annual tasking and budget requirements for the p3 ipt aircraft ground support equipment planning process.
- Directs contractor support personnel in the scoping process and organizes and aggregates information for inclusion in the annual budget.
- Designated sme for aircraft ground support hardware and software for all tacmobile sites.
- Support activity focused on the preparation of specific mission data and media. Provide mission critical quality assurance for p3 ground support systems.
- Initiate and manage the release process for navair tms and aop software to the fleet.
- Perform simulation testing, deployment configuration and verification and initial fleet distribution.

System Integrations Analyst II
ABC Corporation - July 1997 – August 2007

Key Deliverables:
- Developed and maintain the requirements for the generic mission replay (gmr) interface design document (idd), impacting changes in the aircraft replay events or fields.
- Developed and maintain a tme event database to allow for the location of event data for testing.
- Developed and maintain the atos mission reduction formats and test procedures.

- Analyze the bit-oriented extraction data of the p3, s3, maritime patrol aircraft (mpa) and cp-140 aircraft.
- Chairs local configuration control board (lcc) which meets to review all program trouble reports (ptr) generated during in-house testing of each application; assigning status and priorities to each ptr.
- Supports various naval air warfare center (nawc) activities and command and control activities by providing acoustic sensor reconstruction & replay support, ground support, pre-flight media preparation and post flight services to those activities during their test and debug cycles and attends the aircraft lccb meetings representing the tscs.
- Also acts as the facility security officer and is responsible for maintaining logs and records associated with the receipt and storage of all classified material.

EDUCATION

Master's in Management information Systems - January 2005(Strayer University - Temple Hills, MD)BS in Computer Networking - (Strayer University)
