

ROBERT SMITH

Chemical Lab Technician

Phone: (0123)-456-789 | Email: info@website.com | Website: Websit.com

SUMMARY

Motivated Lab Technician extensively trained in laboratory techniques and protocols. Enthusiastic and hardworking with strong analytical and problem-solving skills. Manufacturing and production experience using thermoplastic material. Forklift and scissor lift use. Detailed and reliable.

CORE COMPETENCIES

Inventory Management, Administrative Assistant And Support, Bookkeeping And Secretarial, Quick Learning And Extremely Diligent In Every Task.

PROFESSIONAL EXPERIENCE

Chemical Lab Technician

ABC Corporation - December 2014 – Present

Key Deliverables:

- Inspects, samples, tests, monitors and documents industrial and hazardous waste materials and submits appropriate manifests as required.
- Analyzes and tests unknown hazardous waste streams to identify a type of classification and allow for proper disposal.
- Ensures client facilities comply with environmental regulations and advises clients of proper handling and disposal of hazardous materials.
- Keeps laboratory supplies ready by inventorying stock; placing orders; verifying receipt.
- Maintains glassware by picking-up, cleaning, washing, sterilizing, and distributing.
- Keeps equipment operating by following operating instructions; troubleshooting breakdowns; maintaining supplies; performing preventive maintenance; calling for repairs.
- Authored standard operation protocols for hplc,gc,ft-ir,fluorospectrometer, and atomic absorption.

Chemical Texture Anazlyes

ABC Corporation - October 2014 – December 2014

Key Deliverables:

- Responsibilities I previously worked at Astrix, (for the big heart pet brand inc.) as a chemical texture analyst.
 - Performed regular and non-regular chemical analyses and other associated analytical examinations.
 - These examinations required precise performance and had to be completed by a strict deadline for the products to be marketed.
-

- My specific responsibilities required the independent operation of analytical instruments such as an atomic absorption spectrophotometer, UV / vis spectrophotometer, texture apparatus, ph meter, analytical balances, and sample preparation equipment.
- Upon completion of the analyses, it was also my responsibility to record all results in an electronic (computer) format.
- The types of results entered included graphs, charts, and statistical evaluations that facilitated the search for new analytical procedures and the modification of the existing analyze.
- Pace University, dept of chemistry (preparation of chemicals and equipment.

EDUCATION

BA in Chemistry - 2008(California State University - San Bernardino, CA)
